Introduction

The Scheduling and Reminder System used in many application but here it is designed to help patients and clinics manage appointments efficiently. In many hospitals and clinics, appointments are handled manually, which can lead to long waiting times, missed appointments, and confusion in scheduling.

This project provides an automated system that allows users to book, view, and manage doctor appointments easily. It also helps reduce errors and improves patient satisfaction by organizing schedules effectively.

java Programming
Project Presentation

Objective

- Main goals of the project:
- To develop a system for booking doctor appointments
- To reduce waiting time and scheduling conflicts
- To automate appointment management
- To improve patient convenience and clinic efficiency
- To apply programming concepts like loops, arrays, and conditions

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

java Programming
Project Presentation

Problem Statement

- Manual appointment systems in clinics have several problems:
- Patients forget appointment timings
- Overlapping or double bookings
- Long waiting times
- Poor record management
- This project aims to solve these problems by providing a simple automated system.

TECHNICAL TEAM

java Programming
Project Presentation

System Requirements

- Hardware Requirements:
- Processor: Intel i3 or higher
- RAM: 4 GB minimum
- Storage: 500 MB free space
- Software Requirements:
- Operating System: Windows / Linux
- Compiler: GCC / Turbo C / Code::Blocks / Dev C++

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

java Programming
Project Presentation

System Design

- The system is designed as a menu-driven application.
- Workflow:
- Patient selects option
- Enters appointment details
- System stores and manages data
- Displays appointment list
- Includes:
- Algorithm
- Flowchart
- Modules

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

java Programming
Project Presentation

Module Description

Input Module :

Takes patient name, doctor name, date, and time

Processing Module :

Stores and manages appointment data

Output Module :

Displays appointment details

Data Handling Module :

Maintains list of appointments

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

java Programming
Project Presentation

Algorithm / Flowchart

1. Start
2. Display menu
3. Select option (Add/View/Delete)
4. Enter appointment details
5. Store or modify data
6. Display result
7. Repeat until exit
8. Stop

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

java Programming
Project Presentation

Implementation

- Techniques used:
- Loops (while, for)
- Conditional statements (if, switch)
- Arrays / Lists
- Functions
- The system is implemented to manage doctor appointments efficiently.

Main.java

```
                System.out.println((i + 1) + ". " + list.get(i));
                break;

            case 3:
                if (list.isEmpty()) {
                    System.out.println("No data");
                } else {
                    System.out.print("Enter number: ");
                    int n = sc.nextInt();
                    if (n > 0 && n <= list.size())
                        list.remove(n - 1);
                    else
                        System.out.println("Invalid");
                }
                break;

            case 4:
                System.out.println("Exit");
                break;

            default:
                System.out.println("Wrong choice");
        }
    } while (ch != 4);

    sc.close();
  }
}
```

input

```
1.Add  2.View  3.Delete  4.Exit
Enter choice:
3
Enter number: 10
Invalid

1.Add  2.View  3.Delete  4.Exit
Enter choice:
```

Results & Discussion

- System successfully manages doctor appointments
- Reduces manual errors and waiting time
- Easy to use for patients and staff
- Works correctly for different inputs
- Limitation: No database and real-time reminder

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

java Programming
Project Presentation

Conclusion & Future Enhancement

- Conclusion:
- The system simplifies doctor appointment scheduling
- Improves efficiency and patient management
- Achieves project objectives successfully
- Future Enhancements:
- Add database for permanent records
- Include SMS/email reminders
- Develop GUI interface
- Add multiple doctor scheduling
